Subject: Condenstop Free Vapor Closed Circuit System

Condenstop Free Vapor Closed Circuit System which is patented by Metan Teknoloji Mühendislik San. Ve Tic. Ltd. Şti. was installed our company and since this system has been put into operation, it has worked efficiently and has contributed to our business:

- Eliminated the use of condenstops.
- Terminated the temperature difference between the right and left wings of the cylinders.
- Provided **29** % savings in natural gas consumption.
- The flash steam from condensate tank was regained to process and waste steam release removed from process.
- Reduced boiler feed water by 80%.
- Boiler chemicals used in feed water reduced by about 80%.
- It was eased working system of boiler by increasing the boiler feed water from 102 °C to 150 °C.

The Closed Circuit Unit installed in our company works flawless since it engaged. We would like to express our gratitude to our solution partner, Metantech and Metantech team, for giving product and service to our company by knowledge, experience and wish its continued success.

Best regards
